

Nutripack

Nature in a Box

coralclub

**In order to live life to the fullest,
people need a wide range of vital
nutrients**

Rich sources of vital nutrients

Proteins

Fats

Carbs

Vitamins

Probiotics

Minerals (Micro and Macro elements)

Fiber

What role do these nutrients play?

Fats

- A backup source of energy
- An essential nutrient that supports cell membranes and the nervous system
- Promotes fat-soluble vitamin absorption

Proteins

- Body's main building-block nutrient
- Catalysts in multiple biochemical reactions
- Regulate many intracellular processes
- Support your immune system

Carbs

- A direct energy source
- Any surplus is transformed into a reserve supply of energy (glycogen)
- Are involved in helping cells communicate

What role do these nutrients play?

Probiotics (Healthy Bacteria)

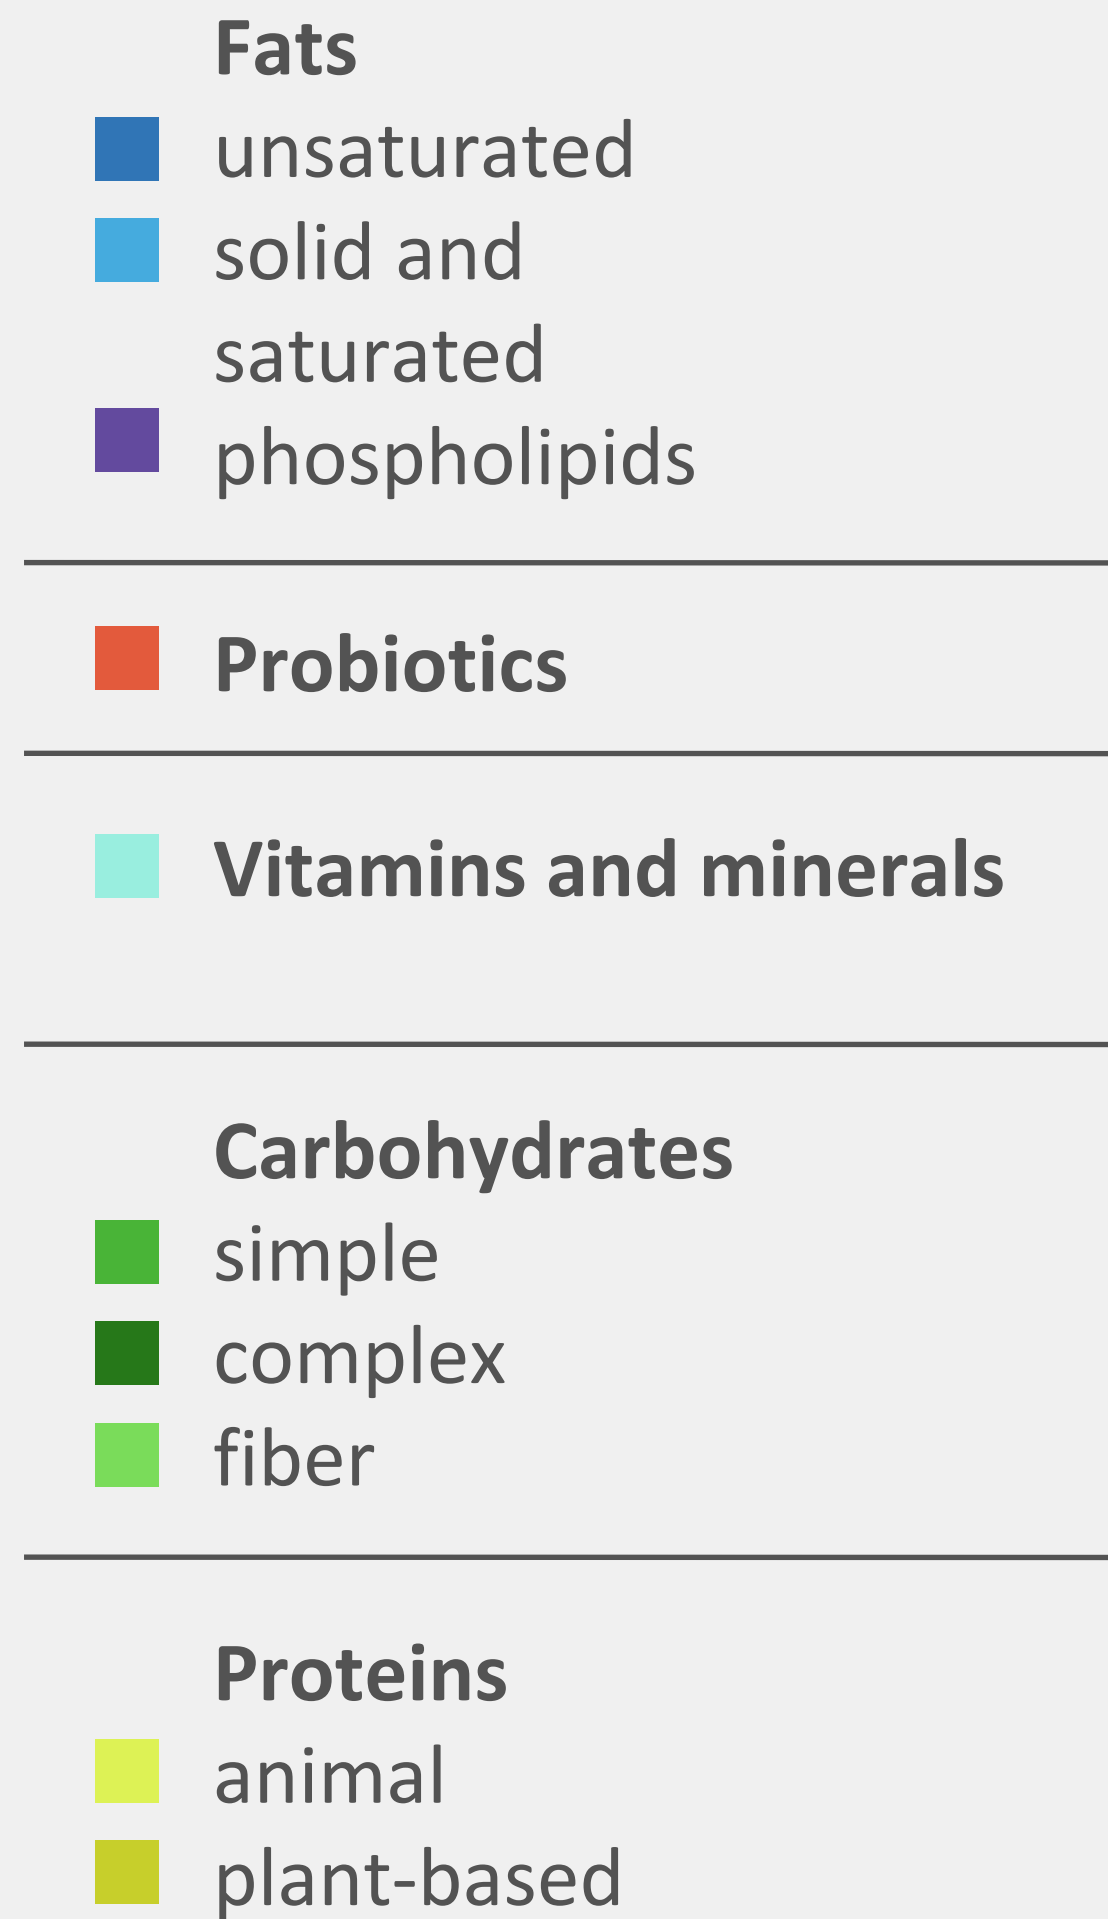

- Restore intestinal microflora
- Promote optimal digestion
- Help hinder hypersensitivity reactions
- Promote a stronger immune system
- Increase the amount of healthy bacteria in the gut, thereby restoring a thriving gut microbiota

Fiber (Dietary Fiber)

- Food for healthy bacteria
- Improves digestion
- Supports detoxification
- Helps control healthy blood sugar levels

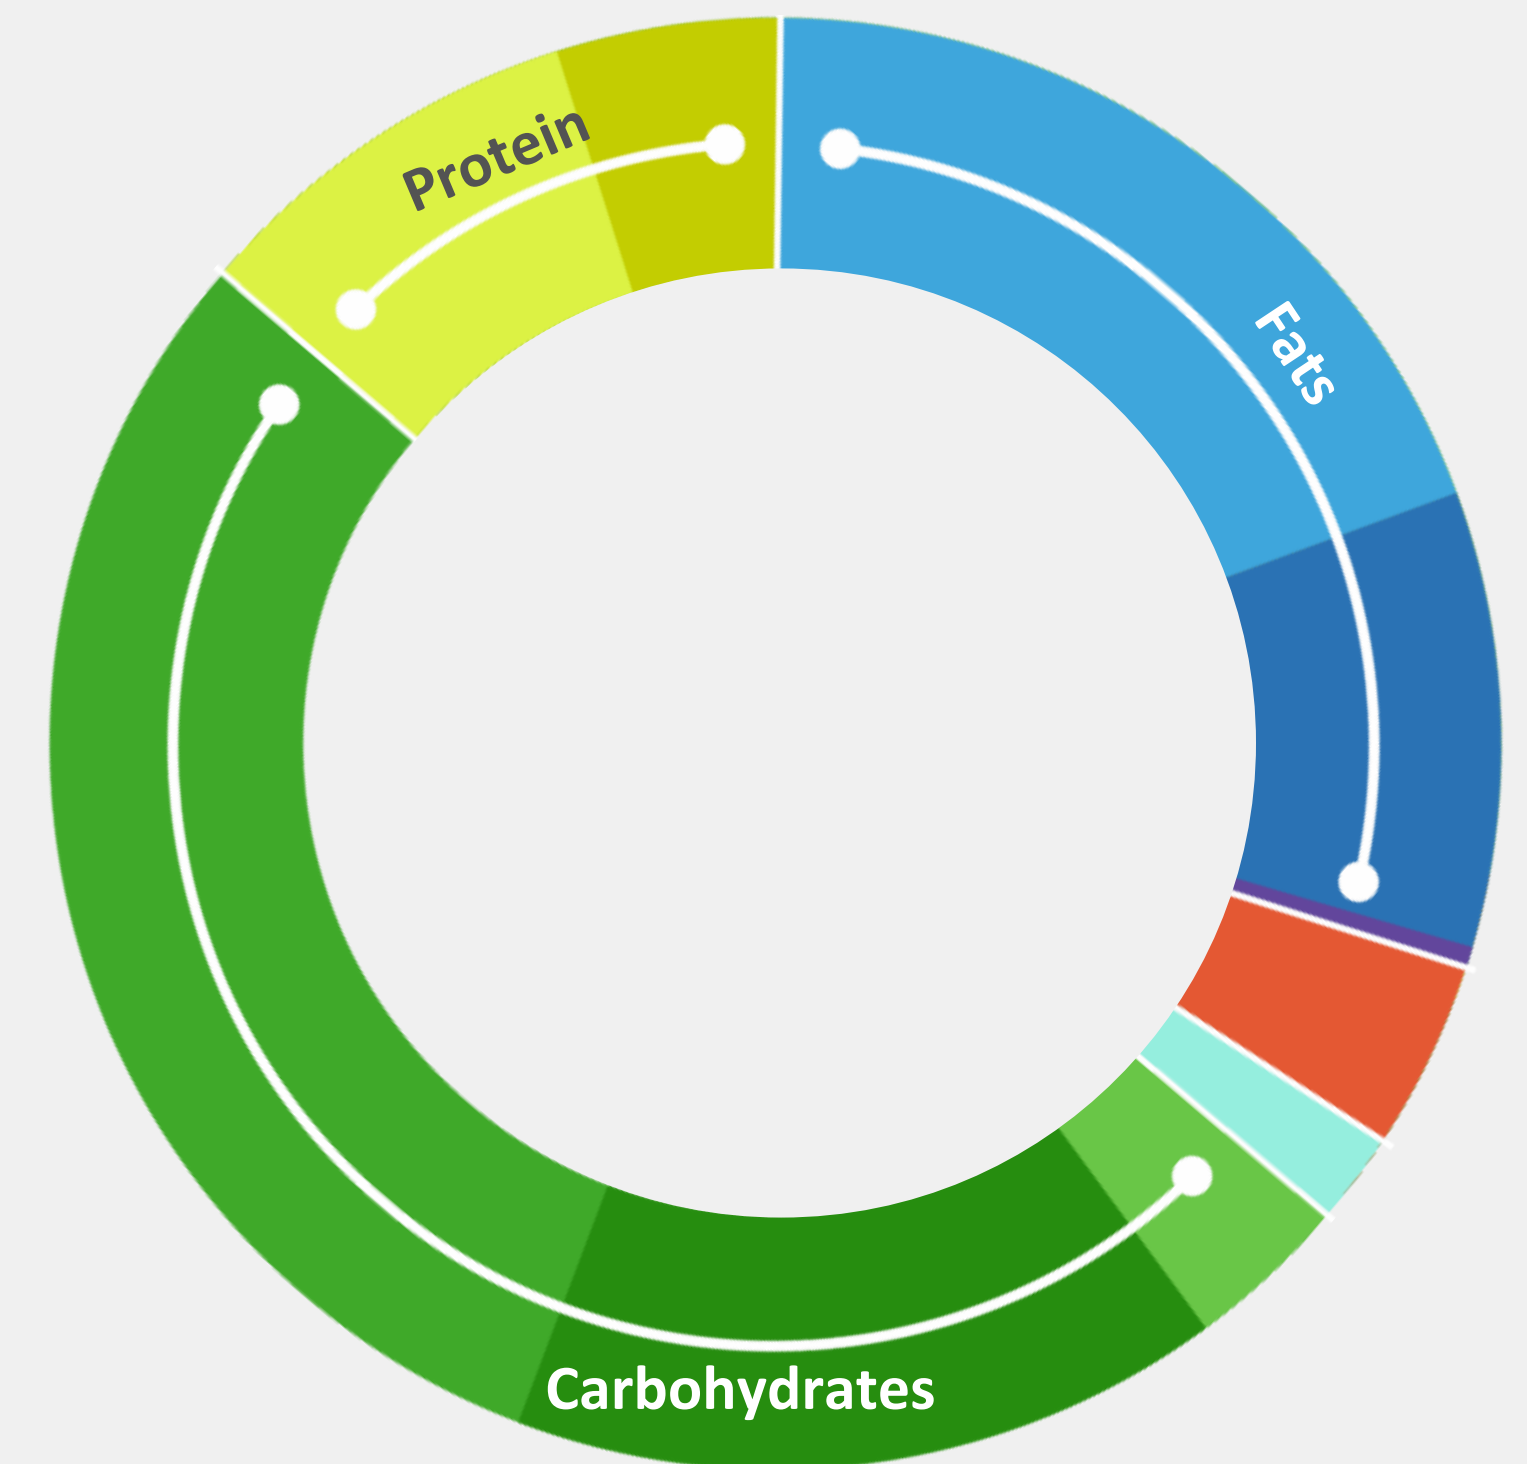

The difference between a balanced diet and today's modern diet

A balanced diet

Today's modern diet

What's wrong with today's modern diet?

Consuming processed foods*, fast foods, out-of-season fruits and vegetables, dairy products **containing vegetable fats**, excess of animal fats, and maintaining a generally one-dimensional diet creates

A deficiency in:

- Vitamins
- Minerals
- Fiber
- Unsaturated Fats
- Probiotics
- Prebiotics
- Phytonutrients

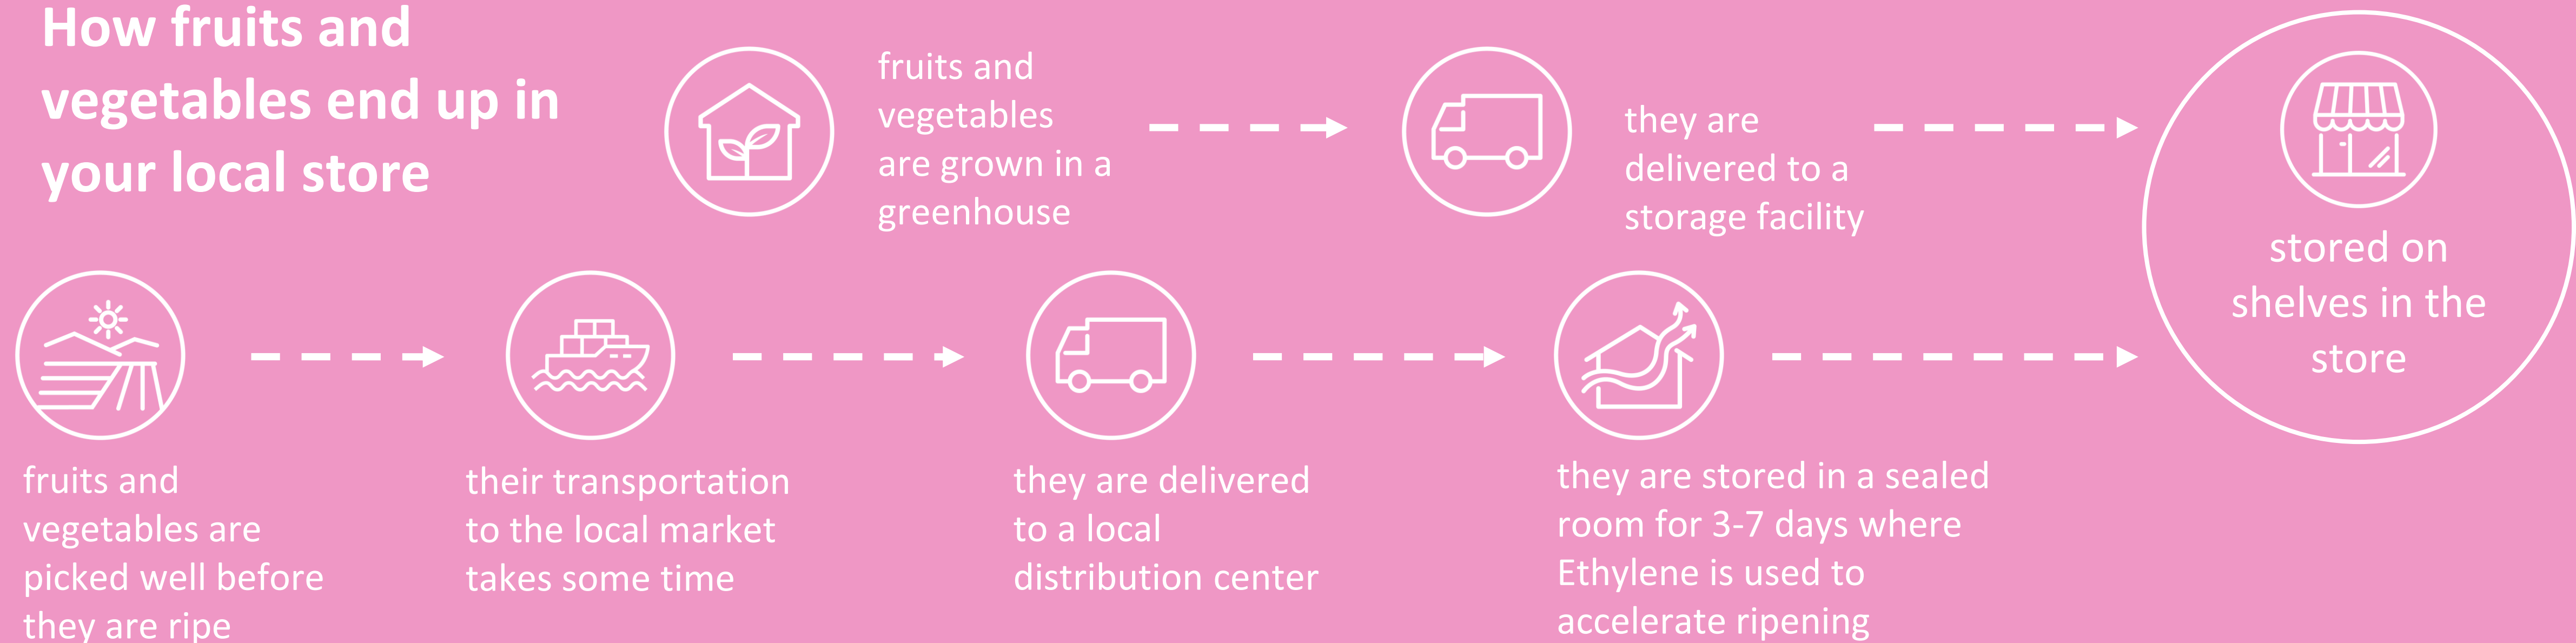

A surplus in:

- Sugar
- Calories
- Fast-Acting Carbs ex. Glucose
- Solid and Saturated Fats
- Salt

How many vitamins do out-of-season fruits and vegetables actually have?

Out-of-season fruits and vegetables are grown in greenhouses or on plantations in tropical climates. If grown on plantations, may result in the accumulation of chemicals--growth and ripening accelerants. If grown in tropical climates, may lead to insufficient vitamin content.

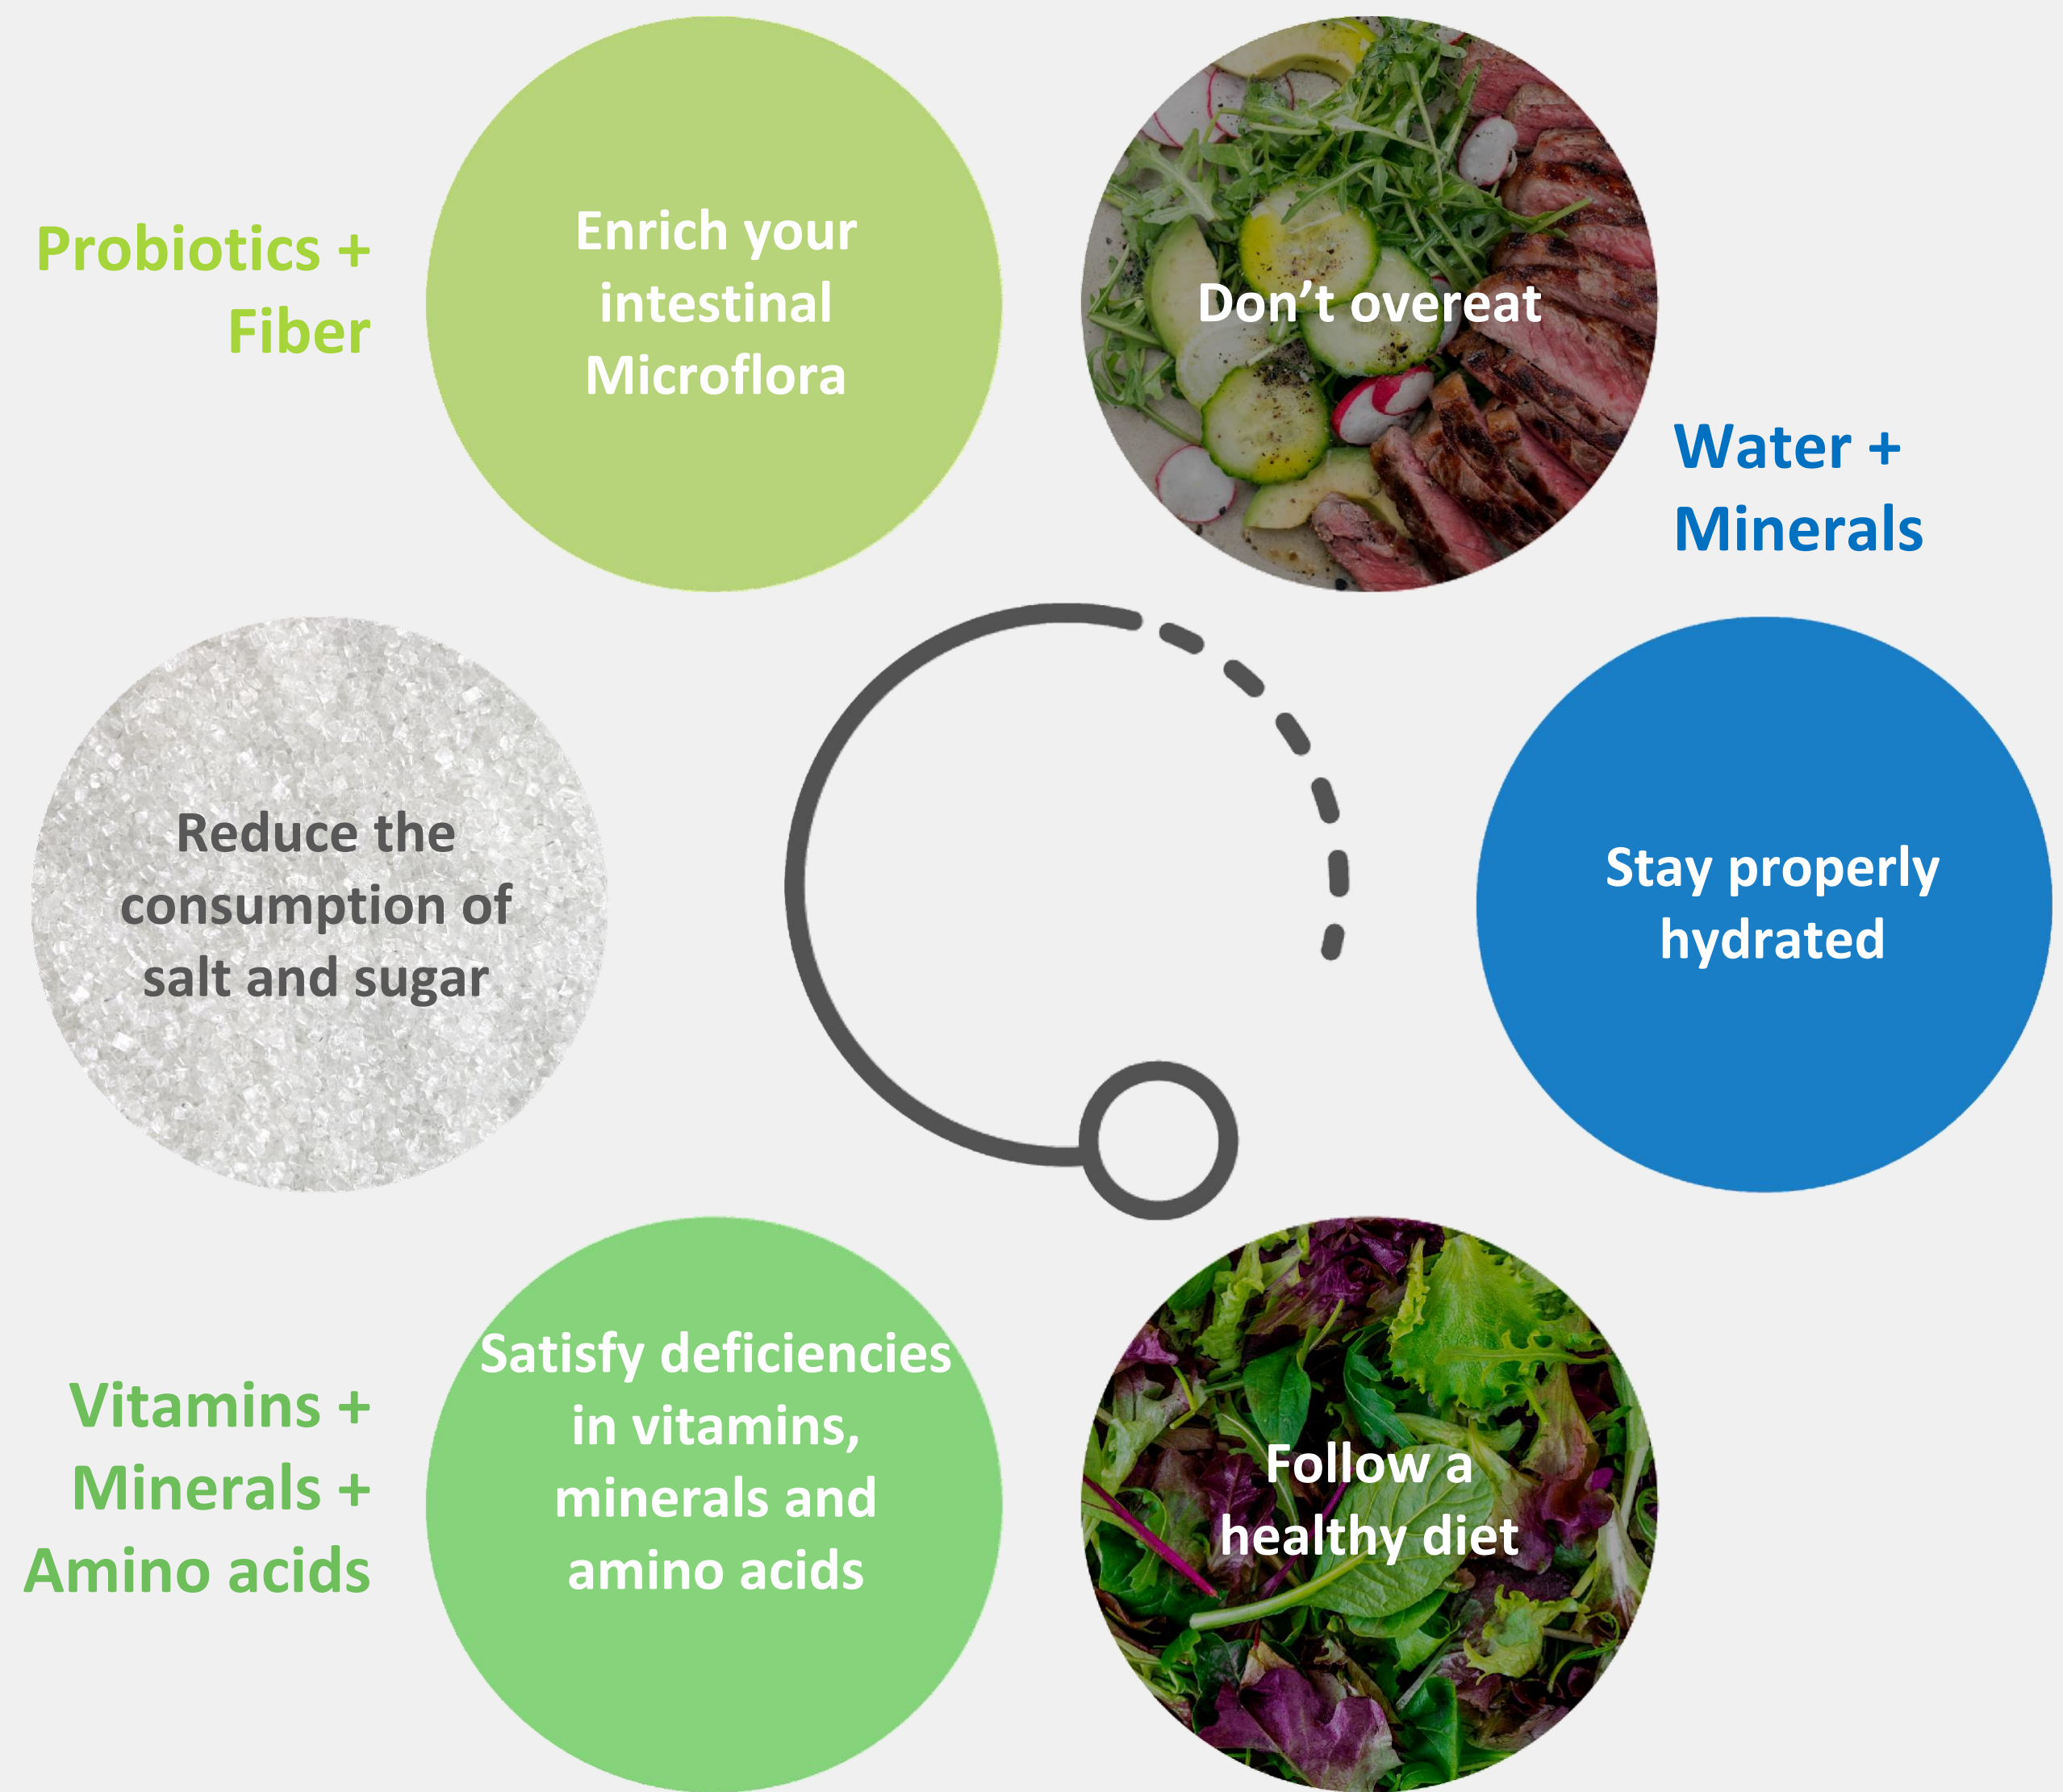

How fruits and vegetables end up in your local store

Prolonged transport and/or prolonged storage time significantly **reduces certain vitamin concentration**

A rational approach to nutrition:

Fulfill Deficiencies —
Reduce Surpluses

Enrich your diet with essential nutrients

Nutripack — It's Nature in a box

Provides added vitamins, minerals, and phytonutrients that are lacking in typical diets

Whole body comprehensive support

A smart approach to a nutritious diet

NUTRIPACK: Here's what to expect in a box of nature

6 products:

Coral Alfalfa,
Premium Spirulina,
Coral Lecithin, O!Mega-3 TG,
Super-Flora, Coral-Mine

Clear usage regimen

Natural ingredients: phytonutrients,
phospholipids, omega-3 PUFAs,
probiotics, minerals

30 days

Coral Alfalfa — a source of fiber, vitamins and minerals

Contains traces of vitamins and essential amino acids

Helps support normal, healthy blood sugar and blood cholesterol levels

Supports your metabolism

Promotes better performance

Premium Spirulina — a source of rare antioxidants and plant-based proteins

A source of easily absorbed plant proteins and free radical fighters, phycocyanin and chlorophyll;

Supports oxygen saturation in the body

Promotes stronger cell membranes

Super-Flora — a symbiosis of pro- and prebiotics

Activates beneficial bacteria growth

Helps improve gut microflora health

Helps improve skin condition

May support or promote stronger immunity

Coral Lecithin — a source of "building" material for cells

Contains phospholipids – the principal cell membrane building material

Supports optimal brain health and nervous system functions

Supports normal liver and brain functions

O!Mega-3 TG — a source of essential fatty acids

An essential nutrient that is lacking in today's modern diet

Promotes cardiovascular health

Aids brain cognitive functions

Supports healthy skin and hair

Coral-Mine — a source of essential minerals from the Deep-Sea of Japan

Enriches water with natural minerals: calcium, magnesium, potassium

Supports the body's mineral balance

Improves the taste and quality of drinking water

Nutripack

A diverse, balanced complex of nutrients

A diverse collection of nutrients

A balanced complex of nutrients

Unique natural components sourced from plants and oceans

Packaged for enhanced absorption and bioavailability
